

## **REMARKS**

This communication is responsive to the Office Action of June 27, 2008 in which the following objections were raised: [1] Claims 1, 7-8 and 19 were rejected under 35 U.S.C. 102(e) as being anticipated by Long et al. (USP 7,177,350); [2] Claims 2-6, 9-10, 20 were objected to as being dependent upon a rejected base claim, but allowable if rewritten into independent form including all of the limitations of the base claim and any intervening claims; [2] Claims 11-18 were allowed.

Applicant has canceled Claims 1, 7-8 and 19 and amended Claims 2-6, 9-10, 20.

Applicant has amended all objected to Claims into Independent form including all of the limitations of the base and any intervening Claims. Examiner will note that in the amendments, the phrase "... normal data transmission mode mode..." found in the preambles of rejected Claims 1 and 19 has been amended to avoid the repetition of the word 'mode' in correspondence with the specification. "*The present invention also provides ...allocations for a normal data transmission mode in a low power mode for...*" (Applicant's specification at Para 12). "*Figure 3 illustrates...allocations for the normal data transmission*
